Sheikh Mohsin

B.Sc. Computer Science & Business Analytics, FLAME University · Pune, India · Data and business analytics internships

sheikh.mohsin@flame.edu.in | sheikhmohsin.vercel.app | github.com/notmohsin | linkedin.com/in/sheikh-mohsin

Education

FLAME University, Pune · *B.Sc. CS & Business Analytics, full scholarship · CGPA 7.65/10* Aug 2024 – Present

- Implemented and compared classification and clustering methods, using PCA to test how feature selection affected model behavior
- Term paper on globalization and India's LPG-era economic reforms (Public Policy coursework)
- Modeled and verified concurrent and distributed systems with SAT solvers, temporal-logic model checking, and Alloy/TLA+ specifications

Experience

Goonj, Delhi · *Research and Operations Intern* May 2025 – Jul 2025

- Traced donation and redistribution data through the sorting pipeline and isolated the stages that created backlog
- Built structured datasets and visual summaries to support allocation decisions
- Tested data patterns against field-team observations before proposing process changes, separating real field conditions from artifacts of incomplete records

Discover India Program, FLAME University · *Research, Taraksi (Silver Filigree)* Sept 2025 – Apr 2026

- Studied, within a 13-member research team, how Taraksi silver filigree moved from a household craft to a commercial practice
- Designed field surveys and semi-structured interviews to capture how artisans describe the shift from craft to commerce
- Synthesized qualitative findings into academic documentation and cultural analysis

PartyHub (Remote) · *QA Testing Intern* Jul 2025 – Aug 2025

- Tested frontend and backend features before release and wrote reproducible bug reports with expected-versus-actual behavior
- Checked API responses and cross-device behavior to expose integration issues before release

IIT Ropar · *Research Intern (Summer Internship Program), SSD Systems* May 2026 – Present

- Compared cache eviction strategies in the SimpleSSD-Standalone 2.0 simulator and designed a spatial prefetching approach for address-translation entries

Projects

IPL Data Mining · *Python, data analysis, visualization* Repository

- Cleaned and explored IPL data to compare team and player patterns, turning match records into findings inspectable through visual summaries
- Built a repeatable analysis workflow that separates data preparation from interpretation so conclusions can be checked against the underlying records

Cache Performance Benchmark Suite · *C++, `perf_event_open`, RDTSCP, Chart.js* Repository

- Measured clock-cycle costs across 16 data structures with hardware performance counters; automated collection, CSV export, and Chart.js charts

Skills

Data: Data analysis, data mining, data visualization, statistical reasoning, SQL, Python
Programming and tools: C++, JavaScript, HTML/CSS, Git/GitHub, Linux, LaTeX, Markdown, basic AWS
Communication: Technical writing, research communication, survey and interview design; English, Hindi, Urdu, Kashmiri

Leadership and Writing

Karta Initiative India Foundation · *University Leader; Technical and Operations Lead, workshops* Aug 2024 – Present

- Peer representative for 40+ Karta Scholars; collected grades, attendance, and records, and ran weekly Sabhas
- Coordinated housing, food, events, and schedules for the summer inter-university workshop

Deccan Herald · *Co-author, "Lost in Instruction" (education policy and technology)* Article
